

WHAT WE DO

Our products are created to discreetly enhance the safety and security of any building with bullet-resistant materials and products. Our team can utilize any finish or wood species to meet your interior design guidelines and décor themes. We strive to give hospitals and clinics a clean, consistent, warm and inviting look for your patients while giving your employees and patrons the safety and security they need.

PLAN DRAFT SECURITY ANALYSIS

Ensuring enough protective measures are in place during the design phase can be a daunting or intimidating endeavor. SafeWood Designs' physical security experts are specifically trained in tactical analysis techniques that identify any weak points in the current design with improvement recommendations.

safety + security. redesigned.

WHO WE ARE

SafeWood Designs, Inc. is a Minnesota manufacturer of bullet-resistant materials and products designed to improve the safety and security of buildings. Our team brings over 100+ years combined woodwork industry experience:

- Industry experts in interior finishing innovation, adaptation of materials, and construction techniques
- Tactical training with SWAT and Navy Seals
- Training with military sniper attack scenerios including structure assaults and counterattack scenerios

HEALTHCARE SERVICE

As one of the top industries prone to witnessing or being subject to workplace violence, healthcare industries are urged to find better security solutions to keep their employees and patients safe.

Studies have found many health benefits of wood interiors. As specialists in physical security for buildings, SafeWood Designs can help create warm, welcoming, calming and healing environments that are discreetly bullet resistant.
